

Data Sheet 10.35 Issue B

Drain Line Valve for Wet Riser

General Description

Rapidrop Drain line valves are used for testing the Rapidrop DRV010 and DRV020 wet riser pressure regulating valve. Installed on the drain line these valves are supplied complete with instantaneous male connection to connect the fire hose.

The drain line valve is fully assembled supplied complete with plastic cap and chain. All valves are hydrostatically tested to 12 bar (175 Psi) and available in grooved or threaded outlet connection.

Specification

	Threaded Drain Valve	Grooved Drain Valve
Outlet	R 2 ¹ / ₂ " (2 ¹ / ₂ " BSPT)	DN65 (76.1) ISO6182 / AWWA C606
Size	DN65 (2 ¹ / ₂ ")	
Max Working Pressure	12 bar (175 psi)	
Inlet	DN65 (2 ¹ / ₂ ") Male Instantaneous Hose Connection BS336	

Material Specification

Part No.	Description	Material
1	Gate Valve	Brass
2	Male Instantaneous Hose Connection	Aluminium
3	Сар	Plastic
4	$2^{1}/_{2}$ " Threaded Nipple	Mild Steel Galvanised
5	$2^{1}/_{2}$ Grooved Nipple	Mild Steel Galvanised

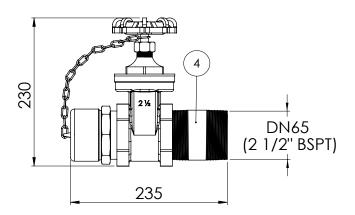

Grooved Inlet Ordering Code

RDDLTV065G

Threaded Inlet Ordering Code

RDDLTV065
